Abstract Submission:

We welcome contributed and poster papers in all areas of physics. Complete abstract submission instructions can be found at <http://www.aps.org/meet/meet-abstract.html>.

The deadline for receipt of abstracts is February 16, 2001. We strongly urge you to proof your abstract before submission. Contributors may submit one of two ways:

Submitting abstracts via the web: To submit a contributed abstract using the online web submission process, an author needs to know two things: (1) the number and ordering of authors and collaborators; and (2) abstract content. The web page will guide you through the rest. Try a test submission before submitting your abstract. Log onto <http://abstracts.aps.org> and select the meeting TEST. Follow the directions online to create your own practice abstract. When ready to submit your abstract online, select the meeting CSS01 by clicking on the appropriate button. A form will be created for you. Simply input the information. Please note: Invited speakers should refer to their letters of invitation for instructions on locating the invited template.

Submitting abstracts via e-mail: Contributors must create their abstracts from an electronic template supplied by the American Physical Society. The template and instruction files for contributed abstracts can be obtained by sending email to abs-request@aps.org with the phrase request CSS01 in the message. Those contributors who are absolutely unable to submit an abstract via the web or electronically should contact meetings@aps.org.

If you have questions regarding abstract submission, please send them to abs-help@aps.org.
