Session J6 CSWP: Women in Academic Science: Balancing Career and Children  Colorado Convention Center 207

11:15AM J6.00001 CSWP Panel Discussion: Women in Academic Science: Balancing Career and Family  SUSAN COPPERSMITH, University of Wisconsin, Madison, MARIJA DRNDIC, University of Pennsylvania, KA YEE LEE, University of Chicago, NADYA MASON, University of Illinois at Urbana-Champaign, KATHERINA VOLLMAYR-LEE, Bucknell University — Many people who are considering pursuing academic careers in science worry about how to balance career with family. One challenge is the two-body problem, where partners are searching for jobs that are reasonably close together. Another challenge, particularly for women, is children: many women worry about whether they can have children as well as successful careers, and if so, when might be the best time to have them. This panel discussion will bring together five women who span a range of stages in their faculty careers and who all have children. Several of them have spouses who are also academic scientists. They will discuss practical strategies that they have adopted to address the challenges of career and family, as well as their views on what departments and institutions can/should do to help.
